Research, Development and Production Review Board
Ideas and Requirements Panel

- I. Meeting #7 was held in the OC Conference Room at 1430 hours on 15 February 1956. The people who attended were:

DOC	53	REV	DATE	30 DEC 53	BY	
ORIG	COMP	071			TYPE	
ORIG	CLASS	5	PAGES	02	REV	BLA
JUST	22	NEXT	REV	2060	AUT	

- II. The following items were discussed:

1. The question was raised by O&T as to the feasibility of utilizing in the Headquarters area an [] system for voice staff communications. The thinking behind this subject was that by mounting such equipment on towers considerably above the ground level and utilizing [] communication equipment a secure voice communications system could be provided. It was developed through discussion that a considerable amount of testing would probably be required in order to determine just what degree of security could be expected for such a system. The O&T representative indicated that he would carry on additional discussions with members of OC-S.

2. The O&T Division reported that there had been some exchange of correspondence with [] relative to the possibility of installing at the [] base station a type of automatic alarm system so that [] out stations could contact the base at any time in case of an emergency. It appeared that there were such types of devices available which may or may not need some technical modification to provide the type of service required. O&T stated that they would get in touch with the Engineering Division at a later date on this matter.
